

BIO ELIXIR FOR GREENHOUSE CROPS AND INDOOR PLANTS

Bio Elixir for Greenhouse Crops and Indoor Plants is an innovative, high-tech product, made in Georgia with European technology and in line with EU standards.

Contains:

Electro-activated water

Hypochlorous acid

Zeolite

Bio Elixir Greenhouse Crops and indoor plants is an organic plant growth aid which forms a protective layer on the leaf surface and deeply penetrates the plant. With a high prophylactic effect and the ability to stimulate plant growth, Bio Elixir Greenhouse Crops and indoor plants is an indispensable product on the organic inputs market.

Has a prophylactic effect on fungal diseases of greenhouse crops (cucumbers, tomatoes, herbs, lettuce, etc.) including: ash, powdery mildew and anthracnose.

Recommendations for plant treatment:

Use to stimulate plant growth and development;

Spray to relieve plant stress;

In case of fungal diseases, use only for prevention;

It can be used at all stages of plant development, as its effects are immediate and has no phytotoxic properties.

Methods of use:

- Used by spraying diluted concentrate or through a drip irrigation system. According to the consumption norm, dilute 8-10 litres of Bio Elixir on greenhouse crops and indoor plants in 600-800 litres of water and use it once every 10-14 days.
- The product is certified by the National Food Agency of Georgia.
- Safe for human health and does not irritate the skin, eyes or mucous membranes.
